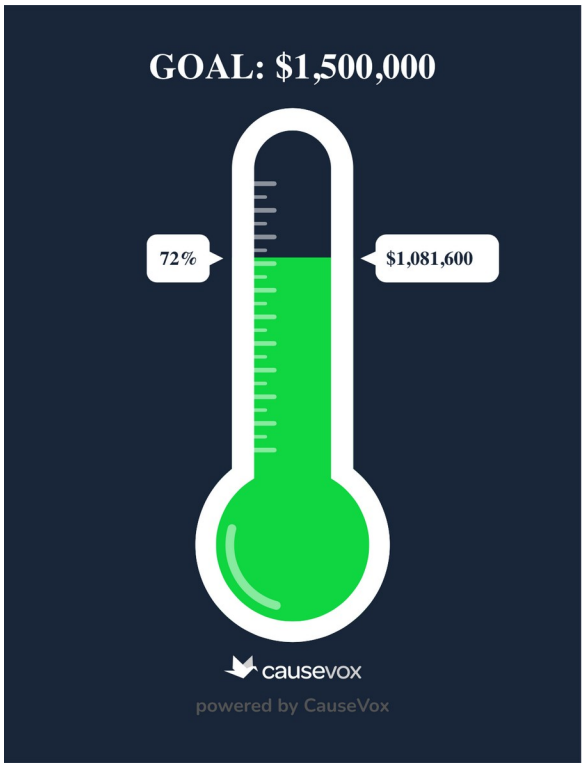
Dear AGC Members,

I hope you are all doing well and having a great winter! As we anticipate the coming warmer weather and the start of the 2023 golf season, our excitement for another terrific year at AGC continues to grow. **PROGRESS** at AGC has been the major theme in recent years. Significant investments to improve our course and facilities have been instrumental in growing our membership, strengthening our financial condition, and building a strong management staff at Alexandria Golf Club. Continuous progress and positive change are vital to the long-term success of any business and our amazing golf club is a remarkable example of the exciting growth that can be achieved through bold and difficult change.

Our vision of building a spectacular Par 3 course appropriately named "The Little Darling" is yet another example of change at AGC that will drive long-term success and have a lasting impact on our members and the Alexandria community for years to come. The unique fundraising efforts we developed to raise money for construction of "The Little Darling" course has been well received. I am extremely grateful to everyone who has contributed or committed to a contribution pledge for the project thus far. Your generosity and excitement for The Little Darling project have been instrumental in our progress to date – **Our goal of $1.5 million to build the golf course is in our sights** as illustrated by the goal thermometer below:



We have now received 91 contribution pledges (26% of our membership) totaling nearly $1.1 million and need only slightly more than $400,000 to reach our goal required to complete construction of The Little Darling course this year. Little Darling contributors receive significant benefits making it a win-win for everyone. Many of you have expressed a sincere interest in helping make The Little Darling par 3 course become reality and I am hopeful you will all consider a contribution to make it happen so you, your families, and your posterity can enjoy the wonderful benefits that will come from the successful completion of the project! I promise you this project will deliver a sea change for AGC and for Alexandria.

Please contact David Kjos (320-760-5955 or kjosnews@gmail.com), Bruce Leland (320-805-0141 or Baleland@gmail.com) or me (216-978-5497 or Jar5858@gmail.com) to make a contribution pledge or answer any questions you might have. Your enthusiasm and generous contributions to this worthy project remind me of a quote I love and find fitting for our situation:

"Happiness doesn't result from what we get, but from what we give!"

Ben Carson

Thanks to Tom Lehman and his design team we have now completed the initial scaled drawings of The Little Darling par 3 course and have provided them to the irrigation system architect to develop the irrigation plans and final material estimate for the project. I have included a copy of the drawings for your review at the conclusion of this communication – I hope they generate as much excitement for you as they do for those of us intimately involved in The Little Darling project.

It's an amazing time to be a member at Alexandria Golf Club and a resident of the Alexandria community. Thanks for your help in getting this incredible project over the finish line – your selfless contributions will benefit our club and community for generations to come! **THANK YOU** for your assistance and your commitment to making AGC and our community better for everyone.

All the best,

Jerry Rose
The Little Darling Project Chair
